HAAS

AUTO RACING

APPROVED

MANUFACTURER: Alpinestars
MODEL: HYPERTECH V2
HOM. NO: DC.013.19-O
FIA STANDARD: 8856-2018

- Certified to the new FIA 8856-2018 homologation standard.
- Super-lightweight and breathable two-layer suit incorporating thin stretchable panels for maximum comfort and effective regulation of body temperature.
- Innovative soft lining material technology ensures breathability and comfort.
- Strategically positioned Formula 1-derived stretch panels at lower back and sides, elbow, crotch and knee zones for enhanced flexibility, both in and out the car.
- Alpinestars fully floating arm construction with stretchable knit fabric ensures minimal material resistance while driving.
- Outershell fabric made with DuPont™ Nomex® fabric offers exceptional heat and flame-resistant properties.
- Soft and thin wrist and ankle cuffs for maximum comfort and reduced weight.v
- Flat seam construction for reduced pressure points and improve strength.

- Specially-designed soft collar incorporates leather details, knit fabric and secure hook and loop closure.
- Alpinestars exclusive shoulder epaulette construction provides an effective feature for the extraction of the driver in the event of a crash.
- Printed logos help maintain the suit's material integrity and reduce overall weight.
- Premium YKK thin lightweight zipper personalized with Alpinestars leather puller, plus double slider for a versatile and customizable fit.
- Sold with laundry bag for convenience and to protect material fibers.
- Ultra fit design.
- Weight 265g / sqm.
- DuPont™, the DuPont Oval Logo, and all products, unless otherwise noted, denoted with ™, SM or ® are trademarks, service marks or registered trademarks of affiliates of DuPont de Nemours, Inc.

GP TECH v3 SUIT AUTORACING SIZE: 44-60 (44 - 64 BLACK)

AUTO RACING

MANUFACTURER: Alpinestars
MODEL: GP PRO COMP V2
HOM. NO: DC.146.121-O
FIA STANDARD: 8856-2018

The GP Pro Comp v2 features an outer shell plain material developed exclusively for Alpinestars which is combined with a soft aramidic base knit lining for optimum levels of comfort, protection, light weight and comfort. Thanks to the introduction of the aramidic base lining with an open weave structure, this suit delivers enhanced levels of breathability, and this is reinforced even further by the strategically-positioned knitted stretchable open mesh panels on the back, crotch and armhole for additional airflow and flexibility, both in and out of the car. This suit also incorporates innovative silicon grip technology detailing on the shoulders and lower back to prevent any movement with the car's seat or a HANS device, and also to reduce pressure on the shoulder.

1. Certified to the new FIA 8856-2018 homologation standard certification.
2. Lightweight and breathable multi-layer suit incorporating mesh stretchable panels for maximum comfort and effective body temperature regulation.
3. Innovative silicon grip technology details on shoulders and lower back to provide more feeling / connection with the HANS device and inside a car seat.
4. Formula 1-derived cable opening for cooling vest system or communications on the left of the body, covered by a self-closing flap to ensure maximum levels of protection.
5. Strategically positioned Formula 1-derived stretch mesh panels on the lower back and crotch for enhanced flexibility, both in and out the car.

- Alpinestars fully floating arm construction with stretchable knit fabric ensures minimal material resistance while driving.
- 100% aramidic anti-static outershell fabric for exceptional heat and flame-resistant properties.
- Ribbed wrist and ankle cuffs for maximum comfort and reduced weight.
- Tall ribbed collar for extended coverage of the neck and improved driver comfort.
- Alpinestars exclusive shoulder epaulette construction provides an effective feature for the extraction of the driver in the event of a crash.
- Opening for cable for cooling vest system or communications on the left of the body, covered by a self-closing flap to ensure maximum levels of protection.
- Premium YKK metal zipper for durability.
- Double slider on front for a versatile and customizable fit.
- Thigh pockets for convenient, unobtrusive storage.
- ALPINESTARS PROTECTS slogan on the lower back of the lining; the same design as used on Alpinestars F1 racing suits
- Comes with a laundry bag for convenience and effective material fiber protection.
- Athletic-Regular fit design.
- Weight 345g / sqm.

This model has been designed and engineered to give drivers the ultimate in performance fit and feel. The Supermono v2 is an ultra-lightweight racing shoe constructed using premium materials with every component reduced in order to save weight. Featuring a new 'sock' construction which is designed to deliver a more sock-like fit, this shoe is also equipped with a more contoured, sculpted shape to better adapt to the lines of the feet, and has a minimal, fuss free construction for maximum lightness with strategically placed perforated zones for exceptional ventilation.

1. Complies with FIA: 8856-2018 homologation standard.
 2. Main upper material is constructed using superior bovine leather the optimum blend of superior mechanical resistance and driver comfort.
 3. The elastic fireproof collar and tongue combines lightweight technology and unsurpassed levels of comfort, for enhanced general performance and an optimized fit.
 4. Main upper leather material made by patented one-piece design for a highly reduced material construction for greater comfort
- and performance in the cockpit.
5. Additional hidden instep fit adjustment for a precise, secure and comfortable fit.
 - Strategically-positioned perforation zones on the lateral and medial sides and the front toe for collar for optimized ventilation, breathability and comfort.
 - Para-aramidic fiber tubular lining construction for excellent heat-resistance, weight saving and strength.
 - Main closure made by hook and loop for ease of use.
 - Lightweight micro-porous padding around the heel and insole entrance for enhanced comfort while driving.
 - Collar padding constructed from nitrile rubber for comfort and light weight.
 - Insole in Texon and micro-porous material on the upper for comfort and light weight.
 - Micro-porous heel for additional shock absorbing and light weight.
 - Alpinestars exclusive thin rubber compound outsole, derived from Formula 1's race program, delivers unsurpassed levels of feel and sensitivity with the pedals, while the textured pattern ensures optimum levels of grip.

- Complies with FIA: 8856:2018 homologation standard.
- Main upper constructed from supple, lightweight kangaroo leather for exceptional levels of comfort and durability.
- Elastic fireproof collar and gusset for weight saving and comfort while also enhancing the general fit.
- Elastic collar features silicon printing for durability.
- Front and rear pull tabs for an easy entry and a precise fit.
- Perforated inner gusset padding for improved comfort and breathability.
- Lightweight micro-porous padding around the heel and footbed for enhanced driver comfort.
- All graphic detailing on the leather features transfer technology for weight saving and improved performance.
- Extensive perforation zones on lateral and medial sides, heel and toe for maximum ventilation and breathability.
- Closure system features an upper aramidic speed lacing system

integrating Alpinestars exclusively developed and proprietary wire closure system strategically enveloping the foot for optimum support and structure. The wire system utilizes high-tensile fibers to ensure a precise and secure fit around the foot.

- Lace Lock System ensure the shoe remains in position.
- Para-aramidic fiber tubular lining construction for excellent heat-resistance, weight saving and strength properties.
- FIA/Alpinestars label on the gusset constructed from fireproof PU film transfer.
- Alpinestars one-piece toe and heel counter features a multi-compound construction, an integrated insole and an ergonomic polypropylene heel counter for maximum support, stability and protection.
- Integrated fireproof PU heel for additional protection.
- Alpinestars exclusive F1-derived thin rubber compound sole for improved sensitivity with the pedals and optimum levels of grip.

The Tech-1T v3 offer drivers optimum levels of comfort, fit and feel. Featuring a full bovine leather construction, the shoe boasts a cut away section at the heel to allow movement while operating the pedals with no pressure points while driving. Every aspect of the shoe has been carefully considered to keep weight as low as possible; the hook and loop strap is a single layer for added lightness, while also ensuring there is no pressure point on the instep, and the classic lace closure system features hidden loops on the lateral and medial to guarantee a snug but unrestrictive fit. The all-new rubber sole, which mimics an asymmetric tire tread, is water repelling and oil resistant to offer high levels of grip and thicker for enhanced levels of comfort in and out of the car, while the mid sole offers reassuring levels of cushioning. Other neat touches include an outer toe protector for comfort and durability, and a Nomex® lining to protect the entire foot against heat.

- Complies with FIA: 8856-2018 homologation standard.
- Main upper material made by full grain bovine leather for the optimum blend of mechanical resistance and driver comfort.
- Equipped with a rear elastic fireproof collar for light weight and enhanced driver comfort.
- Strategically-positioned perforation zones on the lateral and medial sides for maximum breathability and airflow.

- Perforated tongue padding for high levels of comfort and breathability.
- Engineered protection with dedicated lateral and medial toe protectors.
- The dual closure system incorporates an adjustable hook and loop strap plus a traditional lace and a hidden loop system for enhanced durability, as well as a more personalized fit and a secure closure.
- Para-aramidic fiber tubular lining construction for excellent heat-resistance, weight saving and strength.
- Rear pullers for easy entry and a precise fit.
- Lightweight micro-porous padding around the heel and insole entrance for enhanced comfort while driving.
- All graphic elements are in transfer technology for further weight-saving and improved performance.
- Collar and tongue padding constructed from nitrile rubber for comfort and lightness.

- Alpinestars one-piece toe and heel counter features a multi-compound construction and ergonomic polypropylene heel counter plus an integrated insole, which provides support, protection and stability.
- Alpinestars exclusive thin rubber compound outsole, derived from Formula 1's race program, delivers unsurpassed levels of feel and sensitivity with the pedals, while the textured pattern ensures optimum levels of grip.

A high-performance, lightweight, ergonomically constructed supportive guard for the ribs, the Bionic Rib Support incorporates adjustable shoulder straps, a central chest belt and an adjustable back panel to offer kart drivers a supremely comfortable, customized and supporting fit.

1. The technical, multi-layered main construction has been optimized for a performance fit and enhanced comfort:
 2. The advanced, soft poly-Lycra inner lining means the Bionic Rib Support can be worn under or over a garment.
 3. The main body incorporates a 3mm high density poly-foam layer laminated with 3mm absorption EVA for enhanced impact and anti-vibration performance.
- 600D textile outer for high resistance
- to friction and enhanced durability.
 - Dual-density, strategically positioned, ergonomically shaped rib guards incorporate fiberglass core and robust PE hardshell outer for excellent shock dispersion and damping performance.
 - The specially selected materials and components to offer crucial weight-saving performance.
 - Central adjustable back panel with hook and loop attachments offers a complete range of fitment, allowing the guard to be worn under or over a garment.
 - The fully adjustable front strap with D-ring closure features elasticated section for comfort.
 - The adjustable shoulder straps are constructed from highly breathable 3D mesh for optimum airflow and feature an elasticated gusset for a snug performance fit.

- Designed and developed for a fit that is specific to a youth driver's anatomy.
- Frame constructed from injected polymer compound that has been extensively impact tested at performance on a range of off-road surface and varying temperatures.
- Frame has been ergonomically engineered to promote contact with the helmet during impact – including rear support edge that fits closer to the body and raised chest to avoid hyper-flexion injuries - thus providing a solid surface which instantly channels damaging, compressive impact energy away from the neck and on to the support.
- Frame's anatomical profile promotes positive helmet contact in event of a crash while allowing

driver freedom of movement.

- Rear stabilizer system helps keeps support in position and is also designed to channel extreme energy loads away from the spine by transmitting it across the shoulder and helping to avoid serious spinal injury.
- Ultra-lightweight EVA foam on the support's underside for comfort and positioning and to distribute the impact force over the widest possible area.
- Closure system for convenient engagement of support and to facilitate quick removal in case of emergency.
- The support is supplied with the easy-to-use strap system which allows use over or under the suit to secure the device on the driver.

KART RACING

- Advanced seamless thermo-welded construction consists of ultra-thin PU film and 3D mesh to provide supremely lightweight performance and maximum foot sensitivity thanks to the “sock-like” effect, with no pressure points on the foot for excellent comfort and fit.
- Sleek shoe profile follows foot anatomy and guarantees great fit and performance.
- Laser air-intakes and perforations on upper, with 3D mesh on tongue offer excellent breathability and comfort.
- External heel, ankle and internal toe reinforcements for abrasion resistance and protection.
- Alpinestars lace-lock system constructed from an advanced polymer resin guarantees quick, precise and secure closure of the shoe.
- Dual asymmetric closure system incorporates adjustable ultra-thin hook and loop grip strap plus aramidic speed top lacing.
- System integrates Alpinestars

- exclusively developed wire closure system, which strategically envelopes the foot for optimal support and structure and offers durability, precise fit and secure closure.
- Collar padding constructed from PU foam for comfort and weight-saving.
- Soft microfiber collar is cut lower at the rear to allow greater achilles heel comfort and improved range of movement.
- Tongue features perforated soft padding for comfort and improved fit.
- Innovative Alpinestars foot counter for maximum performance: an ergonomic, polypropylene heel counter provides support and stability inside the shoe, while a flatter forefoot with die-cut ribbing provides greater feel on the pedals.
- Ultra-thin Formula 1 specification sole uses Alpinestars exclusive rubber compound for pedal sensitivity and grip, in both wet and dry conditions.

KART RACING

The Tech-1K v2 shoe is ultra-lightweight shoe and is optimized for maximum airflow and breathability, and has a contoured shape and is thus more proportioned to better adapt to the morphology of the feet, thereby improving comfort in the cockpit and reducing driver fatigue. There is also an ergonomic foot bed to ensure the foot maintains a natural, comfortable posture while also allowing maximum flexibility, support and free foot movement.

1. Advanced hybrid construction consisting of durable Nubuck microfiber upper and strategically positioned perforated microfiber areas to ensure light weight, excellent breathability and superior feel.
2. The external toe reinforcement is constructed using 3D rubber print for superior abrasion resistance and protection.
3. The dual and asymmetric closure system incorporates an adjustable hook and loop strap plus a traditional lace loop system coupled with a para-aramidic eyelets system for enhanced durability, as well as a more personalized fit and a secure closure.

- The new superlight tongue is constructed from a combination of perforated microfiber and mesh giving for optimum breathability and airflow and superior feeling.
- Strategically-positioned perforation zones on lateral and medial sides and toe for giving breathability
- The collar is cut lower at the rear to allow for greater Achilles' heel comfort and an improved range of movement.
- Alpinestars innovative foot counter is engineered for maximum performance: an ergonomic, polypropylene heel counter provides support and stability inside the shoe, while a flatter forefoot with die-cut ribbing provides greater feel with the pedals.
- The ultra-thin Formula 1 specification sole uses Alpinestars exclusive rubber compound which is strategically ribbed for enhanced pedal sensitivity and grip in both wet and dry conditions.
- External rear heel rubber for improved abrasion resistance and protection.
- Integrated PU heel for additional driver comfort.

KART RACING

- Main upper constructed from microfiber for optimum levels of light weight, durability, comfort and fit.
- Sleek shoe profile delivers optimized levels of performance both in and out of the car while ensuring optimal feedback from the pedals.
- Mesh material on tongue for comfort and ventilation.
- Ankle protection on collar for additional protection in a key area with mesh material construction for maximum airflow and breathability.
- Rubber patch on heel zone for additional protection and stability.
- Extensive lateral and medial laser cut perforations for enhanced ventilation and breathability.
- Mesh lining with an open

- cell structure optimized for breathability and comfort.
- New light and ultra-thin rubber compound sole for improved pedal feel.
- Traditional lacing for ease of use with gloved hands.
- Integrated rubber midsole for greater heel protection.
- Polypropylene and mesh combine to create a double layer which sits on the footbed structure for enhanced driver comfort and a more precise fit.
- Reinforced heel counter offers additional protection and structure in a key area for a precise and secure fit.
- Printed graphic elements deliver excellent weight-saving performance.

HOW TO MEASURE

- Chest - Measure around the fullest part, under the armpits, keeping the tape horizontal.
- Waist - Measure around the natural waist line, inline with the navel, keeping the tape horizontal.
- Hip - Measure around the fullest part of your hips, about 20cm below waist line, keeping the tape horizontal.
- Thigh - Measure around the thigh just below the crotch, keeping the tape horizontal.
- Inseam - Stand against a wall, ask someone else to measure from the crotch to the bottom of your leg.
- Arm Length - Measure from shoulder (Humerus) to wrist.
- Height - Stand against a wall, ask someone else to measure from the floor to the top of your head, keeping the tape vertical.
